

BACB DC Retirement Plan (“the Plan”)

Chair’s Statement – Year ended 31 March 2025

In accordance with the requirements of the Occupational Pension Schemes (Charges and Governance) Regulations 2015 (“the Regulations”), the Trustees are required to provide a statement relating to the governance of the defined contribution benefits within the Plan.

This Chair’s statement sets out how we have embraced statutory governance standards which are central to the operational aspects of the defined contribution (“DC”) benefits held under the BACB DC Retirement Plan (“the Plan”).

This statement should be read in conjunction with the Statement of Investment Principles (“SIP”) for the Plan dated March 2025. These documents are designed to help members achieve a good outcome from their pensions savings. Andrew Cole (representing BESTrustees) has been appointed Chair of the Trustees for the purposes of this statement.

This statement covers the period from 1 April 2024 to 31 March 2025.

The Trustees are working to wind up the Plan and transfer the assets to the BACB Group Pension Scheme, which has been established as part of the Standard Life Master Trust. This transfer is anticipated to take place in early November 2025. Following this, the Plan will be formally wound up and cease to exist.

Background to the Plan’s benefits

The Plan is a wholly insured scheme as defined in Regulation 8 (2) of The Occupational Pension Schemes (Investment) Regulations 2005. As a result, the assets held by the Trustees of the Plan are in a policy of insurance held with Standard Life Assurance Limited (the “Provider”). A wholly insured scheme is where all the assets (excluding cash held in the Trustees’ bank account) are held in one or more qualifying insurance policies

The sponsoring employer meets the costs of governance and oversight, members meet investment management, administration charges and any associated retirement costs such as annuity broking (where this option is chosen).

At retirement, members can take 25% of their benefits from the Plan as a tax-free lump sum, using the full range of retirement freedoms to access the remainder. Where members elect to take income drawdown, a transfer to an alternative arrangement with Standard Life, outside of the Plan, will need to be arranged.

Governance of the default investment arrangement

As of 31 March 2025, the DC funds under management with Standard Life were as follows. Please note we have shown the current and legacy default option and broken down the top 20 funds used by members. There are an additional 30 funds which we have shown in aggregate.

BACB DC Retirement Plan (“the Plan”)

Governance of the default investment arrangement

As of 31 March 2025, the DC funds under management with Standard Life were as follows. Please note we have shown the current and legacy default option and broken down the top 20 funds used by members. There are an additional 30 funds which we have shown in aggregate.

Self-Select funds	£6,189,111.27
Total	£26,514,353.02

BACB DC Retirement Plan (“the Plan”)

The Plan has a designated default option, i.e. a series of funds into which contributions are placed without the member having made a choice as to where the contributions are allocated. The specific funds used for each member are determined by the member's age. The Plan uses a combination of Standard Life's funds in the default arrangement. These are highlighted in the above tables.

The default arrangement is a 'lifestyle' strategy, which de-risks members' investments from a specified number of years before their selected retirement age. This means that investments gradually move from higher-risk funds into more stable funds (like bonds and cash), while also targeting a specific form of retirement benefit.

The Plan's default arrangement was reviewed and changed to the Sustainable Multi Asset Universal Strategic Lifestyle Profile in September 2022. This was implemented by Standard Life via a gradual change in asset allocation. Members are fully invested in the Standard Life Sustainable Multi Asset Pension Fund up until 10 years from retirement, with the aim to deliver long-term growth. The fund currently invests in around 70% in equities and 23% in bonds. Some members remain in the previous legacy default through choice.

When members are 10 years away from retirement, their holdings start to be gradually transferred to the Standard Life Sustainable Multi-Asset Pre-Retirement Pension Fund. This is a lower risk multi-asset fund which Standard Life considers to be appropriate for members who are yet to decide on which outcome they would like at retirement. This fund aims to continue to provide investment growth at a lower risk than the Sustainable Multi Asset Fund.

Four years before the member approaches their selected retirement age, assets begin to move into the Standard Life Sustainable Multi-Asset At-Retirement Pension Fund so that upon reaching retirement, a member is 100% invested in this fund. At retirement, the types of assets used are similar to those in the growth phase although the weighting differ so that there is a greater focus on capital protection but still maintaining some growth assets to achieve a suitable level of growth.

By investing in this manner, the Trustees expect to deliver growth over the member's lifetime within the Plan without excessive risk taking, with an increased focus in the final ten years of reducing volatility to enable members approaching retirement to make financial plans for the period after retirement.

BACB DC Retirement Plan (“the Plan”)

Standard Life has confirmed the asset allocation of the default fund across a range of age profiles in the table below and has taken account of the statutory guidance.

Asset Allocation on 31 March 2025 (note figures may not add up to 100% due to rounding)	Standard Life Sustainable Multi Asset Universal			
	Standard Life Sustainable Multi Asset Fund			Standard Life At Retirement Pension Fund
	An average 25 year old (%)	An average 45 year old (%)	An average 55 year old (%)	An average person, 1 day before SPA* (%)
Cash	0.0%	0.0%	0.0%	5.1%
Bonds	23.6%	23.6%	23.6%	56.3%

Private Debt	0.0%	0.0%	0.0%	0.0%
Other	0.0%	0.0%	0.0%	0.0%

*State pension age

Legacy default

In addition to the designated default arrangement above, some members are still invested in a legacy default lifestyle arrangement - Standard Life Black Rock 50:50 Global Equity II Universal Lifestyle.

Up until 5 years from the member's selected retirement age, savings are fully invested in the Standard Life BlackRock Managed (50:50) Global Equity Pension Fund. This is a passively managed equity fund which invests 50% of assets into UK equities and the remaining 50% to overseas equities.

Once a member is five years from their selected retirement age, their savings begin to move into the Standard Life At-Retirement (Multi-Asset Universal) Pension Fund.

In the final three years before retirement, some savings are moved in the Standard Life Deposit and Treasury Pension Fund. This strategy leaves members invested in the Standard Life At-Retirement (Multi-Asset Universal) Pension Fund and the Standard Life Deposit and Treasury Fund with an asset allocation of 75% and 25% respectively upon reaching retirement.

Whilst a small proportion of the Plan's members remain invested in this arrangement, it is still appropriately monitored and dealt with accordingly.

Standard Life has confirmed the asset allocation of the legacy default fund across a range of age profiles in the table below and has taken account of the statutory guidance.

BACB DC Retirement Plan (“the Plan”)

Asset Allocation on 31 March 2025 (note figures may not add up to 100% due to rounding)	Standard Life Black Rock 50:50 Global Equity II Universal Lifestyle			
	Standard Life BlackRock Managed (50:50) Global Equity Pension Fund			Standard Life At Retirement Pension Fund (75%) Standard Life Deposit and Treasury Pension Fund (25%)
	An average 25 year old (%)	An average 45 year old (%)	An average 55 year old (%)	An average person, 1 day before SPA* (%)
Cash	0.0%	0.0%	0.0%	22.3%

Other	0.0%	0.0%	0.0%	0.0%

*State pension age

Within the default investment arrangement there have been no performance-based fees incurred during the Plan year, which would be calculated in accordance with Regulation 25(1)(a) of the Administration Regulations 1996.

The SIP is prepared in accordance with Regulation 2A of the Occupational Pension Schemes (Investment) Regulations 2005 and was updated by the Trustees and published in March 2025, at the time of the last investment review. A copy of the latest SIP (and the Scheme's Implementation Statement) is available at the following website:

<https://www.bacb.co.uk/compliance/pension-scheme-death-benefits>

The SIP sets out the aims and objectives of the default options as well as providing details of all investment options that are available to members. Based on the data provided by Standard Life, over 75% of members' assets are currently invested within the current default and legacy arrangements.

One of the key responsibilities is to ensure that, based on the aims and objectives of the default arrangement; the default strategy is designed in the best interests of all members. Individual preferences can be addressed by the member choosing their own funds within a suitable range.

BACB DC Retirement Plan (“the Plan”)

The Plan’s investment strategy was last formally reviewed in September 2022. The review was triggered when Standard Life proposed a change to the default arrangement. These changes increased the level of risk in the growth phase of the default by increasing equity exposure and introducing a higher focus on ESG factors. The Trustees reviewed the sustainability of this change. This is described further in the Statement of Investment Principles (SIP) dated March 2025, a copy of which is submitted alongside this governance statement.

Value for members

Under the Occupational Pension Schemes (Administration, Investment, Charges and Governance) (Amendment) Regulations 2021, trustees of schemes providing DC benefits are required to carry out an assessment of their scheme’s value for members.

Following The Pensions Regulator’s (‘the Regulator or ‘TPR’) guidance, an assessment of value for members has been carried out for the Plan which considered the following aspects.

- Costs and charges
- Net investment performance
- Governance and administration

Looking firstly at cost and charges, whilst that the current charges members pay are reasonably competitive, they could be further improved to provide better value for members when looking at the wider marketplace.

Turning to net investment returns, the default investment strategy performs well over the most recent 12-month period however, longer term comparative performance fares less well. Looking at three of the most popular self-select funds indicates reasonable performance but generally not exceeding comparator funds.

Finally, the Plan is well governed and administered meeting the Regulator’s minimum standards in this specific area of assessment.

Overall, given the need to pass all three sections, the Plan did not quite meet the value for members requirements across all areas being assessed.

The Trustees are in the process of winding up the Plan, and transferring the assets to a master trust arrangement with Standard Life. The asset transfer is anticipated to take place in early November 2025, with the wind up completing in early 2026.

BACB DC Retirement Plan (“the Plan”)

Charges and transaction costs

Costs and annual charges borne by members’ funds may have a significant impact on their accumulated pension funds, so it is important to keep these to a minimum. To help with this objective the Government has imposed a charge cap of 0.75% p.a. from 6 April 2015 for the default investment option of all arrangements being used to meet auto enrolment requirements. This cap does not include transaction costs. We have considered this cap in connection with all members and not just active members.

The annual ongoing bundled charges levied by the pension provider and deducted from members’ investment depends on the funds used and the table below shows this charge.

In addition to these explicit member charges, members may also incur transaction costs. Transaction costs are defined in regulations as the costs incurred because of buying, selling, lending or borrowing investments and they can have a significant impact on members’ fund values.

Transaction costs are typically categorized as explicit costs or implicit costs. Explicit costs are directly observable e.g. taxes such as stamp duty. Implicit costs cannot be observed in the same way but will result in a reduction in the total amount of money invested e.g. buying and selling spreads and market impact and can have a significant impact on net returns.

The costs and charges made available to us are reviewed on an annual basis by our advisers, First Actuarial. This review covers both the default arrangement and the self-selected options chosen by members.

Due to the methodology used in calculating transaction costs, these costs may be negative, therefore having a positive impact on the fund. The transaction costs incurred as disclosed by Standard Life are shown in the table below as of 31 March 2025.

As above, please note we have shown the current and legacy default option and broken down the top 20 funds used by members.

BACB DC Retirement Plan (“the Plan”)

Cumulative costs and charges

The Trustees have conducted an analysis of the cumulative impact of the member-borne costs and charges within the various investment funds for typical members of the Plan, which is set out in the Appendix A.

Net investment returns for the Plan

The following table reflects the annualised performance of each fund over varying periods based on investment after charges have been deducted and has considered the statutory guidance when preparing this section of the statement. They have been calculated on a geometric basis, assume a £10,000 investment fund and are to 31 March 2025.

As above, please note we have shown the current and legacy default option and broken down the top 20 funds used by members.

Standard Life North American Equity Pension Fund	4.68	15.00	12.36	13.05	11.48	13.41

Standard Life do not provide fund performance for 3-year periods.

Given the de-risking strategy under the default lifestyle, the net investment returns for a 25,45 and 55 will be the same.

BACB DC Retirement Plan (“the Plan”)

Core financial transactions

The processing of core financial transactions is regularly monitored by our administrators, Standard Life, who has implemented internal controls procedures that help ensure that such transactions are processed promptly and accurately.

The administration services monitored include the following “core financial transactions”:

- timely investment of contributions;
- transfers of assets relating to members into and out of the Plan;
- transfers of assets relating to members between different investments within the Plan; and
- payments from the Plan to, or in respect of, members.

Other activities covered include controls and procedures to manage the accuracy of investment allocations and the settlement of benefits. In addition, the prompt resolution by of any inconsistencies identified in accordance with the applicable service level agreement timeframes in place.

To help gain assurances that the administration is being dealt with promptly and accurately, we undertake on a regular basis the following with input from Standard Life:

- Monitoring services against contractual service level agreements (‘SLA’).
- Reviewing the quarterly governance reports provided by Standard Life.

During the period of this statement, 92% of non straight-through tasks were completed within the 10-day SLA.

Trustee knowledge & understanding

In accordance with Section 248 of the Pensions Act 2004, the Trustees, acting through their representatives, are required to maintain sufficient knowledge and understanding to fulfil their duties. All representatives are required to undertake continuous training evidenced by a training log, complete the Pensions Regulator’s Trustee Toolkit online training modules and certify a “fit and proper” test.

The Trustees are supported by independent and professional advisers who ensure that they are kept abreast of the latest legislative, regulatory and market developments that apply to the Plan. These advisory appointments are also periodically reviewed.

The Chair of Trustees representing the client is BESTrustees. They provide their staff with bespoke training involving external experts who present on a periodic basis on subjects including defined contributions arrangements. They also have sufficient knowledge and understanding of the relevant principles relating to the funding and investment of occupational pension schemes.

The Trustees have put in place arrangements for ensuring that they take personal responsibility for keeping themselves up to date with relevant developments and periodically carry out a self-assessment of training needs. In addition, the Trustees receive advice from professional advisers and the relevant skills and experience of those advisers is a key criterion when evaluation adviser performance or selecting new advisers.

BACB DC Retirement Plan (“the Plan”)

During the year, the Trustees have met the requirements of Section 247 and 248 of the Pensions Act 2004 (requirement for knowledge and understanding) through training sessions.

The combination of trustee training, the appointment of a professional trustee and advice from professional advisers means that the Trustees can effectively exercise their role as Trustees of the Plan.

The Chair’s statement regarding DC governance was approved by the Trustees and signed on their behalf by:

Andrew Cole, BESTrustees Limited

Chair of the Trustees

Appendix A

The Trustees have taken account of the statutory guidance when preparing these illustrations. The assumptions used to calculate the cumulative pension costs are based on actual Plan information and are as set out below.

Assumptions

- Projected pension pot values are shown in today's terms and do not need to be reduced further for the effect of future inflation
- The starting pot size is assumed to be £1,000 for table 1 and £38,500 for table 2
- Inflation is assumed to be 2.5% each year
- Contributions are assumed to age 65 and increase in line with assumed earnings inflation of 2.5%, each year
- Values shown are estimates and are not guaranteed
- Projection 1 is based on the youngest member who has 46 years to go until their retirement at age 65. The member has a current salary of £25,000, has future contributions of 10% of salary and current fund value of £1,000
- Projection 2 is based on an average member who has 22 years to go until their retirement at age 65. The member has a current salary of £84,000, has future contributions of 19% of salary and current fund value of £38,500
- The projected growth rates for the funds in the Standard Life Sustainable Multi Asset Universal Lifestyle (default) are:
 - Standard Life Sustainable Multi Asset (PP) Pension Fund 3.00% above inflation
 - Standard Life Sustainable Multi Asset Pre-Retirement (PP) 2.33% above inflation
 - Standard Life At Retirement - Universal (PP 10 Year) 2.18% above inflation

The projected growth rates for the funds in the Standard Life Black Rock 50:50 Global Equity II Universal Lifestyle (legacy default) are:

- Standard Life BlackRock Managed (50:50) Global Equity 3.50% above inflation
- Standard Life At Retirement (Multi Asset Universal) 2.38% above inflation
- Standard Life Deposit and Treasury 0.50% below inflation
- The projected growth rates for the funds highest and lowest cost self-select funds are:
 - SL abrdn MyFolio Managed III Pension Fund 2.54% above inflation
 - SL Schroder US Mid Cap 3.34% above inflation

Projection 1 (Youngest Member)

Projected Pension Pot in today's money								
	Standard Life Sustainable Multi Asset Universal Lifestyle (default)		Standard Life Black Rock 50:50 Global Equity II Universal Lifestyle (legacy default)		SL abrdn MyFolio Managed III Pension Fund (lowest charges)		SL Schroder US Mid Cap (highest charges)
